PROFILE

I started with hardware and ended up in code: more than ten years in tech support and installations, up to leading a technical department, and building software since 2020. Today I work on Mercado Libre's in-house CRM, with Go, React and generative AI. On my own I build websites, chatbots and systems end to end.

EXPERIENCE

Software Engineer · Mercado Libre — Sep 2024 – present
I work on the team that builds the company's in-house CRM. I'm migrating its legacy admin panel to a new product and added an AI assistant that answers questions and runs tasks.

.NET Developer · Axoft Argentina — May 2022 – Sep 2024
I modernized Tango from Delphi to .NET and Angular: I built the Automatic Orders module and migrated Orders.

Software Development Analyst · Neoris — Nov 2021 – Apr 2022
Full-stack features (.NET and Angular) for the management platform of a multinational certification and inspection company.

.NET Developer · Project Lead · Ministry of Labor — Feb 2020 – Feb 2022
The Ministry's remote-work form, end to end: I started as a developer and ended up as Project Lead.

CAREER 2009–2021

Head of the Technical Department · Bio Card Tecnología — 2014 – 2021
I led electronic security installations: from technician to head in a year, with 8 technicians and external crews.

Electronics technician and IT support · Norauto, La Simbólica and enAlfa — 2009 – 2013

PROJECTS

SetPoint · Own SaaS · tennis and padel tournament management — setpoint.ar
Founder. I designed and built the whole product: product, architecture, backend, frontend and payments. It brings together online registration, Mercado Pago payments, automatic round-robin fixtures, live standings and two-sided result confirmation.
Next.js · TypeScript · Mercado Pago

This site · Bilingual site with an AI assistant — ezequielunia.com.ar
Assistant on the Claude API with tool use: it answers from the site's content and drafts quote requests the visitor confirms.
Next.js · TypeScript · Claude API

STACK

AI / LLMs	Claude API, OpenAI, Gemini, Cursor
Backend	Go, C# / .NET, SQL Server, MySQL, MongoDB
Frontend	React, Next.js, TypeScript, React Native, Angular
Infra / Cloud	Git, GitHub, Firebase, Networking

EDUCATION

University Technical Degree in Programming · UTN · National Technological University — Graduated in 2023

IT Bootcamp Backend Go · Mercado Libre — Sep – Dec 2024

C#, .NET and Angular LAB · Neoris — May – Sep 2021

Virtual Simulation Design and Programming · Escuela Da Vinci — 2014 · first and second terms

LANGUAGES

Spanish (native) · English (basic)
